 Forensic services group

## »» The Group.

### »» Forensic Services – with competence and passion

We specialize in difficult cases, in particular in the area of white-collar crime. We fight for the right of the injured parties, take care of the settlement of damage, investigate the facts of a case, secure evidence and trace seizable assets.

We engage in complex civil litigation, safeguard the rights of the injured parties in criminal proceedings against the damaging parties and enforce debts nationally and internationally. We advise companies in compliance issues, analyze weaknesses within your company, identify risks, investigate accounting and balance sheet manipulations and provide competent crisis communication services.

Our experts cooperate across our group companies – from A to Z.  
With competence and passion.

### »» Görling Rechtsanwalts-gesellschaft mbH

Our lawyers advise and represent companies and institutions, which suffered damage through corruption, fraudulent insolvency, fraud, breach of trust, theft, embezzlement, money laundering, industrial espionage and product piracy. We enforce claims for injured companies, insolvency administrators and shareholders with determination and in a single-minded manner – both in and out of court.

Our team of lawyers consists of highly qualified specialists in the areas of civil law, litigation and criminal law with long-standing and practical experience in litigation. Our advisory committee provides for a continuous transfer of knowledge with renowned universities and research institutions.

### »» Görling Forensic GmbH

Our specialists use their wide experience and long-standing practical knowledge in the fields of white-collar criminalistics, business administration, auditing, compliance and IT forensics in order to detect fraudulent acts within your company, to identify suspicious cash flow and furnish proof of any accounting and balance sheet manipulations that will stand up in court.

In particular, we provide support to companies in the development, introduction and improvement of their compliance organization in order to prevent any breaches of the rules or damage caused by fraudulent acts.

Debtors who systematically keep seizable assets away from execution are a part of everyday economic activity. If debtors then pretend to be impecunious or even disappear, claims for which a legally enforceable instrument was obtained with a considerable expenditure in terms of time and cost are in danger of becoming worthless. We assist creditors in the execution of titles particularly in such cases.

The lawyers of Görling Rechtsanwalts-gesellschaft für Zwangsvollstreckung specialize in resolute execution against debtors and their accomplices who want to conceal seizable assets from their creditors. Together with our Research Team, we trace such assets both nationally and internationally and execute successfully even in difficult cases where others give up.

## »» Görling Research Team

Our Research Team specializes in procuring information and evidence and thus supports and complements the work of our experts in all three group companies. Nevertheless, you may also make use of our research know-how independently of our other services.

Our Research Team procures information on parties involved in lawsuits, examines the submissions of opposing parties with regard to their truthfulness and traces seizable assets for the purpose of successful debt enforcement both nationally and internationally. In doing so, our researchers make use of all legally available possibilities offered by the Internet. We comprehensively analyze databases and registers in Germany and abroad. We investigate the facts also on site, interview witnesses and referees and secure evidence - to make your lawsuit or debt enforcement a success.

»» Our guiding principle.

»» We excel in difficult cases.

We fight for your right. With competence and passion. ««

Dr. Helmut Görling, lawyer and Chief Executive
